**Nesneye Dayalı Analiz ve Tasarım Dersi**

**Proje Adı:**

Lokanta Sipariş sistemi ( Restaurant Ordering System : ROSys )

**Rapor 4:**

System Sequence Diagrams; State Machine Diagrams; Operation Contracts

**Grup No:** 06

**Grup Adı:** Firestone

**Grup Üyeleri:**

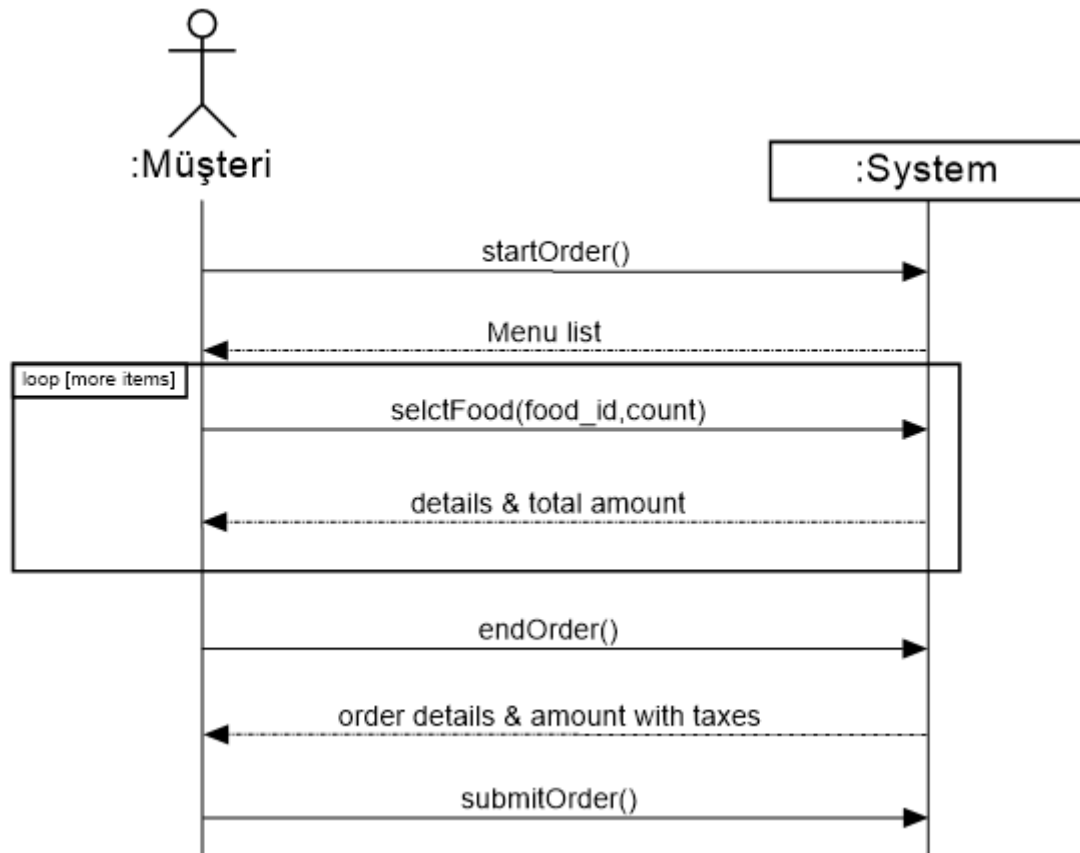

**Amer Sawan (130401073)**

**Abdoul Karim Touré (130401078)**

**DANIŞMAN:** Yrd. Doç. Dr. Ali Murat Tiryaki

## Use Case 1 : Placing order

### 1- System Sequence Diagram

### 2- State Machine Diagram

### 3- Operation Contracts

Contract CO1: startOrder	
<b>Operation</b>	startOrder()
<b>Cross References</b>	Use Case : Placing order
<b>Preconditions</b>	none
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- An Order instance was created with name (o).</li><li>- (o) was associated with the currently logged in customer instance.</li></ul>

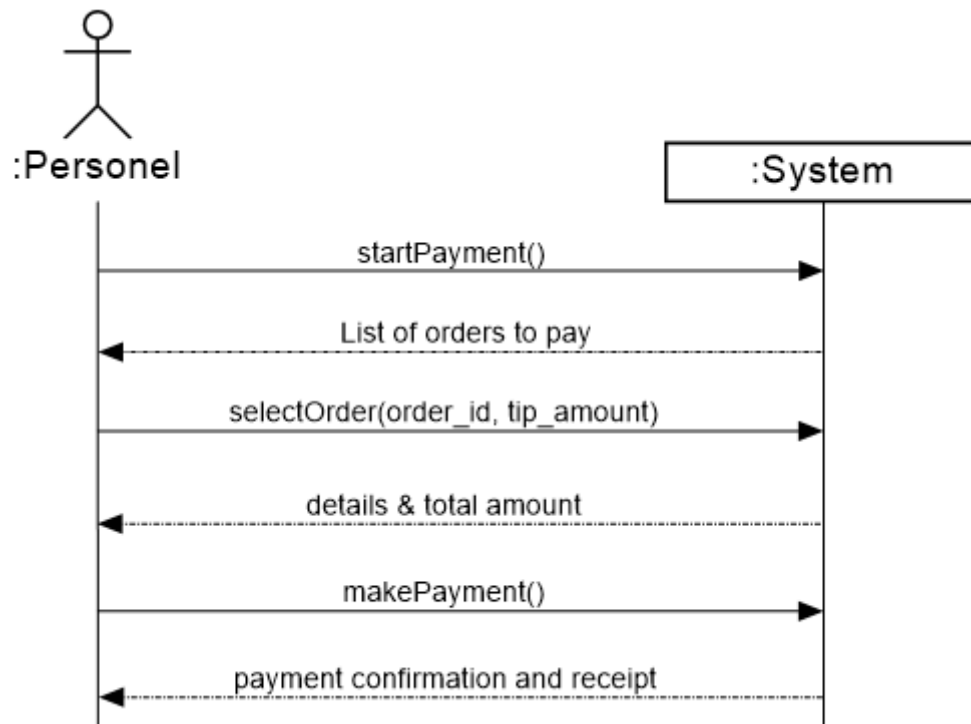

Contract CO2: selectFood	
<b>Operation</b>	selctFood(food_id, count)
<b>Cross References</b>	Use Case : Placing order
<b>Preconditions</b>	There is an order underway.
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- A FoodLineItem instance was created with name (fli).</li><li>- (fli) was associated with the current order.</li><li>- (fli) was associated with Food, based on food_id match.</li><li>- (fli.count) became count (which came from parameters)</li></ul>

Contract CO3: endOrder	
<b>Operation</b>	endOrder()
<b>Cross References</b>	Use Case : Placing order
<b>Preconditions</b>	There is an order underway.
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- The current underway order item's isCompleted attribute became true.</li></ul>

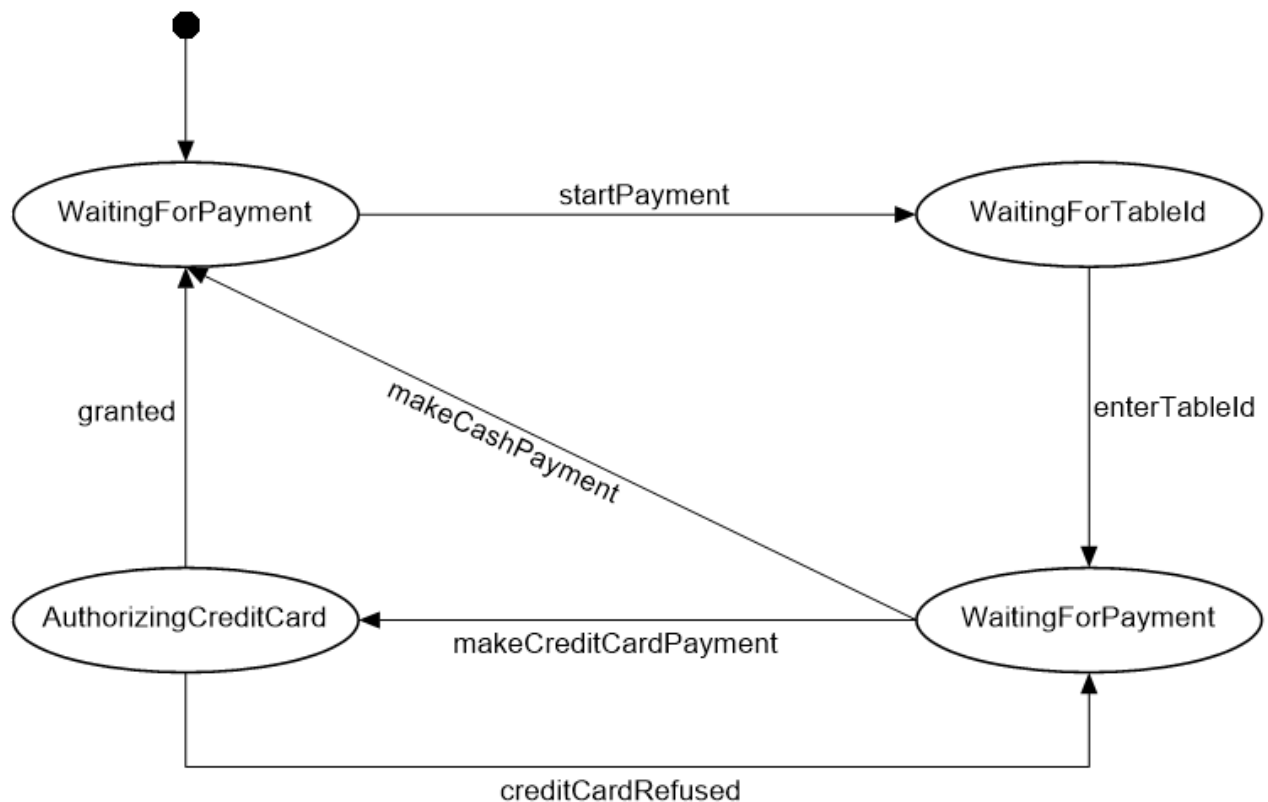

Contract CO4: submitOrder	
<b>Operation</b>	submitOrder ()
<b>Cross References</b>	Use Case : Placing order
<b>Preconditions</b>	There is an order underway.
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- The current underway order item's isSubmitted attribute became true.</li></ul>

## Use Case 2: Process Payment

### 1- System Sequence Diagram

### 2- State Machine Diagram

### 3- Operation Contracts

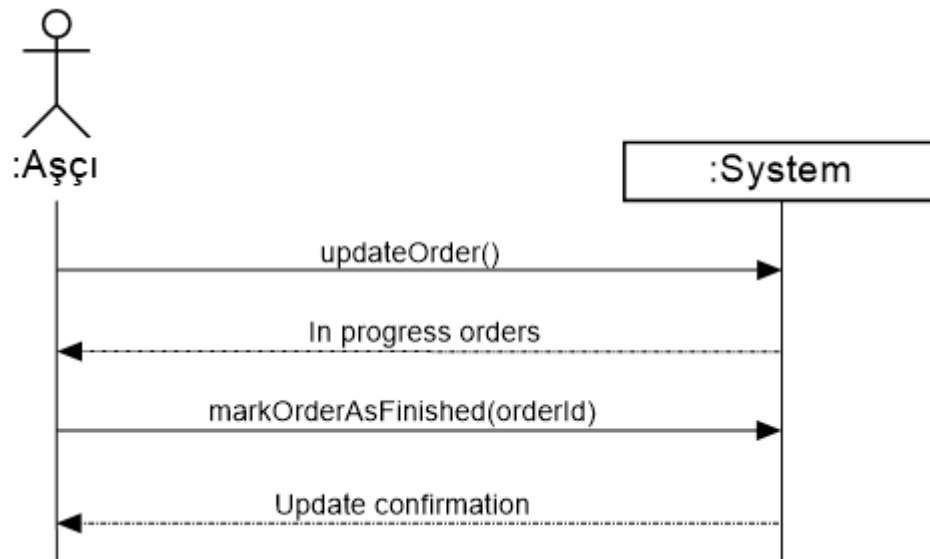

Contract CO1: startPayment	
<b>Operation</b>	startPayment()
<b>Cross References</b>	Use Case : Process Payment
<b>Preconditions</b>	none
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- A Payment instance was created with name (p).</li></ul>

Contract CO2: selectOrder	
<b>Operation</b>	selectOrder(order_id, tip_amount)
<b>Cross References</b>	Use Case : Process Payment
<b>Preconditions</b>	There is payment underway with name (p)
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- The current payment was associated with order instance, based on order_id</li><li>- p.tip_amount attribute became equals to tip_amount (parameter)</li></ul>

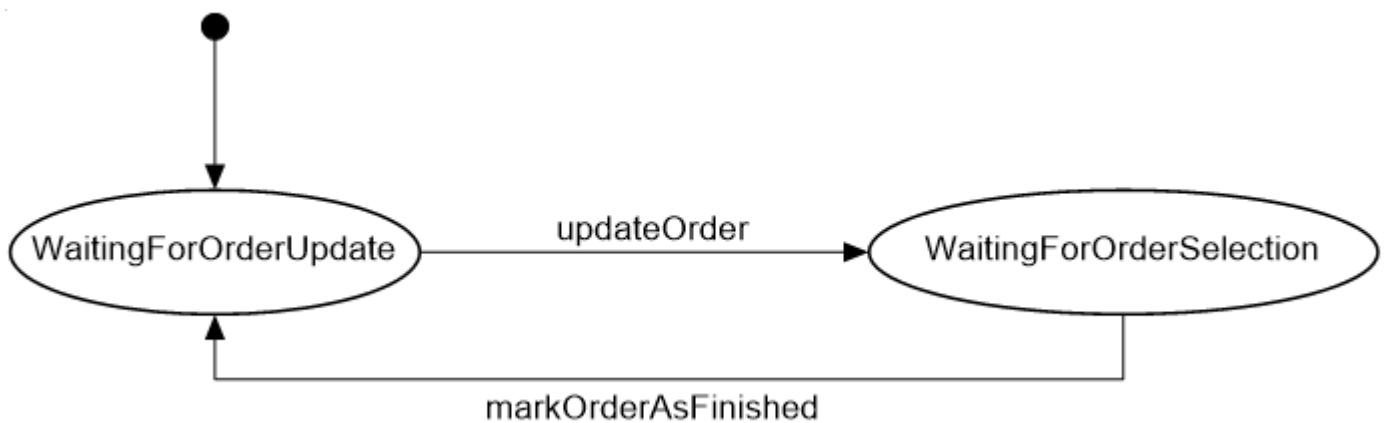

Contract CO3: makePayment	
<b>Operation</b>	makePayment()
<b>Cross References</b>	Use Case : Process Payment
<b>Preconditions</b>	There is payment underway with name (p)
<b>Postconditions</b>	<ul style="list-style-type: none"><li>- p.isCompleted became true</li><li>- the current order attached to the payment p became associated with the Ledger instance.</li></ul>

### Use Case 3 Update Order Status to Ready

#### 1- System Sequence Diagram

#### 2- State Machine Diagram

#### 3- Operation Contracts

Contract CO1: updateOrder	
Operation	makePayment()
Cross References	Use Case : Process Payment
Preconditions	None
Postconditions	None

Contract CO2: markOrderAsFinished	
Operation	markOrderAsFinished(orderId)
Cross References	Use Case : Process Payment
Preconditions	None
Postconditions	- The order instance (o) that has o.id equals to orderId is updated so o.Status became "Finished"
